

KEY HEALTH SimpleCare – The Way It Works

The monthly premiums for private health insurance have spiraled upwards in recent years and these increase with age when you need the cover the most and when your income is normally on the decline. Coupled with this is the added problem of the language barrier and when it comes to your health, you want to be absolutely sure that you are getting the very best of care should you need it.

SimpleCare operates differently from general private health insurances. Firstly Simplecare provides a low-cost, high quality scheme that allows consumers to gain access to the health care they need without the exclusions, limitations and paperwork etc. Secondly, if you are suffering from a medical condition and cannot get insurance, Simplecare will not exclude you. You can enroll in the plan and get affordable care immediately. Best of all, the premium is nominal and does not increase in line with your age.

SimpleCare gives members immediate access to a network of world class medical professionals in state of the art hospitals and clinics for both in and out patient procedures. This includes doctors, specialists, labs and scans, dental, vision and even cosmetic surgery at significantly reduced

rates. How can they do this? zSimpleCare is a large US based company which enables its members to gain access to reduced rates that are only usually available to major insurance companies. Instead of charging high monthly premiums and getting involved in the expense of the mass of paperwork that this entails, SimpleCare members pay for their treatment at the point of service and thus cut out all the admin costs allowing members to benefit from discounts which can be as much as 70%.

To become a member of SimpleCare you can simply apply online at www.simplecarehealthplan.com, pay a nominal yearly premium and you will receive your membership card within a couple of weeks.

Even if you already have private medical insurance, you may find that you are not covered for some existing or chronic conditions in your plan so SimpleCare would be ideal for you to obtain the massive discounts on treatment for these conditions, or for example age related dental work, opticians or cosmetic surgery. If you have no private health care cover, then SimpleCare is an ideal solution for you to gain access to prestigious private medical services at affordable prices.
